Safi Siddiqui

MERN Stack Developer | AI Engineer | Aspiring Data Scientist

7898202372 ◇ safisiddiqui33@gmail.com ◇ Bhopal, M.P, India ◇ Open to Remote ◇ Portfolio

SUMMARY

Computer Science & Engineering undergraduate focused on **full-stack software development and AI engineering**, with hands-on experience building MERN applications, AI-powered systems, RAG pipelines, and data-driven solutions. Experienced with **React, Node.js, Express.js, MongoDB, Python, REST APIs, LangChain, LangGraph, LLMs, vector databases, and machine learning workflows**.
Strong interest in designing production-oriented systems with **clean architecture, scalable backends, AI agents, retrieval-augmented generation, and intelligent automation**. Currently expanding expertise in DevOps, and production-grade AI applications.

SKILLS

Languages: Python, Javascript, TypeScript, JAVA
Frontend: HTML5, CSS3, Tailwind CSS, React.js, Next.js, Responsive Design, Bootstrap
Backend: Node.js, Express.js, REST APIs, FastAPI, JWT
Databases: MongoDB, MySQL, PostgreSQL
Machine Learning: Supervised Learning, Unsupervised Learning, Feature Engineering, Model Evaluation
Deep Learning: Neural Networks, CNNs, RNNs, LSTMs, Transformers
Computer Vision: OpenCV, Image Processing, Object Detection, Image Classification, YOLO
Data Science: NumPy, Pandas, Matplotlib, Seaborn, Plotly, EDA, Data Cleaning, Data Visualization
Developer Tools/Deployment: Git, GitHub, Postman, Thunder Client, Vercel, Netlify, Docker

PROJECTS

AI-Powered Chat Application

- **React.js | Node.js | MongoDB | LangChain | RAG**
  - Developed a full-stack conversational application integrating an LLM with a retrieval-augmented generation pipeline.
  - Implemented document/context retrieval to provide responses grounded in application data.
  - Connected React frontend with a Node.js backend through REST APIs.
  - Used MongoDB for application data persistence.
  - Designed the system around modular AI and backend components to support future model and retrieval upgrades.

AI-Powered Beneficiary Registration Agent

- **Python | Streamlit | LangGraph | LangChain | Groq | PostgreSQL**
  - Developed an AI-assisted beneficiary registration system capable of collecting structured information through conversational interaction.
  - Built an **agentic workflow using LangGraph** to dynamically determine missing information and control conversation flow.
  - Implemented structured data extraction from natural-language responses.
  - Designed dynamic questioning based on beneficiary requirements such as education, medical, and financial needs.
  - Designed multilingual interaction capabilities including English, Hindi, and Roman Hindi/Urdu-style input.
  - Explored image capture/upload workflows for associating beneficiary documentation with database records.

Face Mask Detection

- **Python | TensorFlow | Keras | OpenCV | CNN | NumPy | Matplotlib**
  - Developed a **Convolutional Neural Network (CNN)** to classify facial images into **Mask** and **No Mask**
  - Preprocessed and normalized image data, including resizing and dataset preparation for model training.
  - Designed and trained a CNN using convolution, pooling, dropout, and fully connected layers.
  - Evaluated model performance using **accuracy, loss, confusion matrix, and classification metrics**.
  - Integrated **OpenCV** for real-time face detection and mask classification through a webcam.

EDUCATION

Bachelor of Computer Science & Engineering, All Saints College of Technology, RGPV University — Aug '24 — Present, Bhopal , MP

- Pursuing a degree focused on **Computer Science, Software Engineering, Data Structures, Artificial Intelligence, Machine Learning, and Full-Stack Development**.

Senior Secondary Education, All Saints School, Gandhinagar — Apr '23 — Apr '24, Bhopal , MP

- Science stream with foundational coursework in mathematics, programming, and problem solving.
